Stuart Nursery

WEATHERFORD, TEXAS

PLANT FOR { BEAUTY
PLEASURE
PROFIT

TO CENTRALIZE our business and for the convenience of our customers the mail orders will be handled at the nursery at Weatherford, Texas, instead of at Strawn, Texas, as in the past. All plants listed in the catalogue along with many others will be available at our Nursery at Weatherford, Texas, and also at our Nursery at Desdemona, Texas. We do hope as many of you as can will visit one of these nurseries in person.

BURKETT

The Pecan, State Tree of Texas, surpasses all trees for sheer beauty, permanence, and profit. Plant Stuart's papershell pecans for your own pleasure and profit, and to provide a natural endowment for your children and grandchildren.

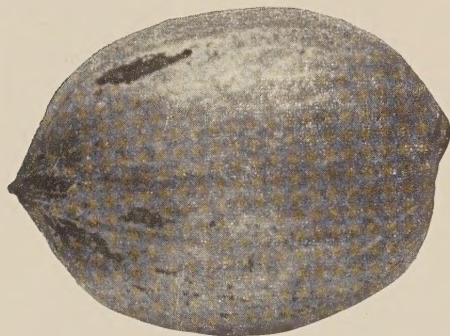

With great pride we offer you our proven varieties of budded papershell pecans. We consider the varieties offered and our own stock in these varieties to be of the best. Our trees grow much faster, are more productive, and bear younger than the seedling trees.

Closest attention is given by the management to see that only the very best bud woods are selected for the budding of our papershell pecans. These fine buds are budded on hardy Texas pecan seedlings. This combination of rugged root stock and buds of high quality and vitality produces the best of trees.

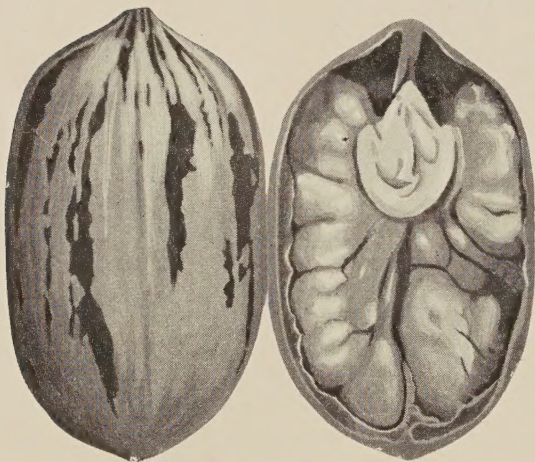

In planting, bear in mind the permanence of the pecan tree and its great size; allow plenty of room. Do not plant the trees closer than 40 feet to each other. In commercial plantings, it is better to space them 60 by 60 feet.

In ideal pecan soils, the post-hole digger may be used to open the holes for the trees. Plant the trees about two inches deeper than they stood in the nursery row. Return the good top soil to the hole first, water well, and finish refilling hole with dirt and tamp well.

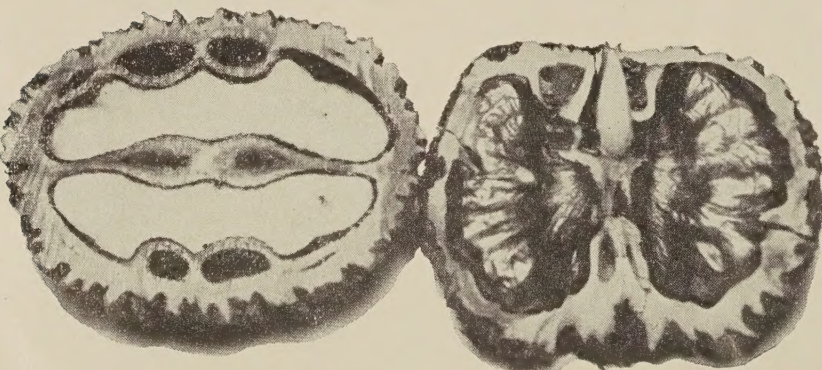

In tight soils, it is better to open a good-sized hole so the trees will find a friendlier place in which to establish themselves.

SUCCESS

STUART

THOMAS BLACK WALNUTS

WESTERN SCHLEY

ENGLISH WALNUTS

STUART'S PAPERSHELLS FOR PERMANENCE AND PROFIT

MAHAN (Illustrated on Front Cover). This is the most beautiful of all pecan trees, and bears the world's largest and thinnest-shelled nuts. Fastest grower, very hardy, and bears very young. Classed as an Eastern variety, but has proven more profitable in Central West Texas and Oklahoma, where it is being planted more and more. Does well throughout the South. In some localities, kernels do not entirely fill the shells, but will be firm and tasty. Nuts are filling well in our nursery area. Mahan has topped in sales with us lately. It is especially desired for lawn planting. Trees are record producers and nuts top the market. By all means, plant the Mahan.

Price that nice pecan tree in your neighbor's yard—it would cost you plenty, if you could buy it at all.

STUART. This beautiful, upright growing tree makes itself at home wherever pecans are grown. It prospers in the bottom lands of the West, is a leader in Oklahoma and Arkansas, and has been planted heavily throughout the Southern states for years. Nuts are large and long, and though not so thin-shelled as some, are not thick-shelled. Nut is of high quality, and trees are in great demand. Many nurseries are out of these trees before the season is over.

BURKETT. The most popular of the Western varieties. Since introduction, it has gained friends faster than all others. There are never enough Burkett nuts in the fall to supply the market demand. Trees thrifty, fast-growing. Bear very young. We have them producing in the nursery rows with three-year tops. Nuts round, large, very thin shell. Fine flavor and excellent quality. Favors upland soil.

WESTERN SCHLEY. Especially adapted to section just west of the cross-timber section of Texas. A beautiful tree. Fast grower, very productive. Long, thin-shelled nuts. Large and fine quality.

SUCCESS. One of the most popular of the eastern varieties. Tree is very resistant to scab and is a vigorous grower, making a beautiful shade. The nuts are large and plump, inclined to be round.

PRICES ON PAPERSHELL PECANS

Size	Price	Doz. Lots Each
2-3 ft.	\$2.40	\$2.20

5-7 ft.	6.40	6.00
7-9 ft.	8.50	8.00

THE YOUNG MAHAN
PECAN TREE IN OUR
NURSERY ROW

HARDY TEXAS SEEDLING PECAN. This is the root stock upon which our paper-shell trees are budded. Seed from the river and creek bottoms of central West Texas. Very hardy and well adapted to our soils and climate. Seedling trees do not make as rapid growth as do budded trees, nor do they come into bearing as quickly.

3-5 ft., \$1.95 each; 7-9 ft. \$6.00

Stuart trees and plants are propagated, grown, dug and shipped by our experienced organization. Every precaution is taken to insure accuracy.

First-class stock cannot be sold for prices lower than ours.

THOMAS BLACK WALNUT, best producer of fine nuts. The Thomas Black is a large, thin-shelled black walnut that bears a fine crop in the nursery rows on three-year tops. Plant the Thomas Black and gather the fine flavored nuts, store in your cellar for winter eating and choice candy. Note picture of well-filled kernels. Nuts can be easily cracked and often separate in halves. Trees fast growers and valuable shade trees. Hardy, and very attractive. Stand for more cold than English Walnut. Placed at the top of the list of all Black Walnuts by nearly all the Experiment Stations. Stuart Nursery recommends the Thomas Black. We propagate only the Thomas of the many Black Walnuts. It seems at home everywhere.

2-3 ft., \$1.65; 3-5 ft., \$2.70 each

Wrap Trunks of Large Size Pecan and Walnut Trees with Burlap to Protect from Hot Sun During First Growing Season.

ENGLISH WALNUT, WILSON WONDER. The Wilson Wonder is the only English Walnut that did not winter kill at our nursery during the severe weather of the last two winters. Fast growing and one of the most beautiful of all trees. Bears very young. Nuts large and good quality. Trees have smooth white bark, dark green, extra large foliage. We consider the Wilson Wonder one of the best shade trees for our section. None of the English Walnuts are dependable bearers in the Southwest, but this one will bear some nuts and you will take great pride in showing them to your friends.

2-3 ft., \$2.50; 3-5 ft., \$3.00; 5-7 ft., \$4.35 each

TEXAS ALMOND. You will be surprised and pleased with this tree. The understock of this almond is peach. You may expect it to grow and produce wherever peaches thrive.

5-7 ft., \$2.50 each

VISIT OUR NURSERIES
AT DESDEMONA AND
WEATHERFORD, TEXAS

Our Pecan and Walnut trees are dug by hand. This is a painstaking and laborious process, but this method of digging allows us to send you FRESHLY DUG TREES. It is our policy to send out trees and plants as freshly dug as possible.

STUART'S FINE FRUIT TREES BEAR

KEIFFER

STUART'S DELICIOUS PEARS

The pear is one of the most dependable of all fruits. The tree is long lived, and seems to withstand unfavorable weather conditions better than any fruit-bearing tree. The fruit has many uses, hauls and keeps well, and stays on the tree for a long period. This allows ample time for marketing.

KEIFFER. The heavy red blush of our strain of Keiffer adds greatly to its appearance. The nearly blight-proof, rugged, drouth-resistant tree is a splendid grower and a great producer. Its large fruit leads commercially, cans and preserves well. Excellent for eating if wrapped in paper and stored. Ripe late in September.

DOUGLAS. Bears very young; often has fruit in the nursery rows on two-year trees. Ripe August 20th. Fruit should be thinned. Good quality. Medium size. Trees nearly blight proof. Medium sized tree.

GARBER. Late August. Sometimes called Sugar Pear. Tree a good producer, long lived. Thrifty and will stand neglect. Fruit large, golden-green color. Fine quality, and good eating pear. Excellent for canning. One of the best.

LE CONTE. Early August. Tree hardy, fast growing, and not subject to blight. Fruit bell shaped, yellow, with creamy flesh. Fine for eating. Good cooker. An old Southern favorite.

ELBERTA

YOUNGER AND MORE PROLIFICALLY

PEACHES

ELBERTA. The Elberta is the standard par-excellence of all yellow, freestone peaches, and has been for many years. As yet it has no real challenger for its crown. It is a large, perfect freestone peach, with lots of color and fine flavored, red splashed, golden flesh.

For several years, Elberta has been the heaviest and most persistent bearer of any of the 20 varieties in our test orchard. Remember, the Elberta is the leading home and commercial orchard peach, and is adapted to the widest territory of any peach. We recommend it above all others. For satisfaction, plant Elberta. Ripe July 20-25.

NEW ELBERTA. July 1. One of the new Yellow Freestones. Considered by many growers as the best of its season. Red cheek, large, and heavy bearer. High quality, and good shipper. This one has proved itself to be one of the best. Good flavor, fine canner. Sells well from trucks.

HILEY BELLE. The earliest commercial freestone, white-fleshed peach; for many years the South's greatest early commercial variety. Medium sized, with beautiful red blush and tough skin. The flesh is juicy and very tender. Good shipper and also desirable for home use.

ELBERTA CLING. This is a wonder peach. The quality of its fruit and the persistent bearing of the tree have made it more popular each year. The very best as a shipper and keeper. Truly a great companion peach for the Standard Elberta of which it is a seedling and with which it ripens. Fine red color splashed with yellow. This large peach is delicious for fresh eating and it is a "demand" for pickling and canning.

INDIAN CLING. Last of July. White cling spotted with red; red streaks to seed. Medium to large. Fine flavor, good shipper. Very productive. Your Indian Cling will bear when others fail.

HALEHAVEN. One of the very best. Lots of red color and perfect golden flesh. We believe it is surpassed only by Elberta. Of finest flavor and one of the best shippers. Flesh separates from seed perfectly. It is a favorite in Texas and good reports come from all peach-growing sections. We highly recommend Halehaven. Ripe about June 25.

LATE ELBERTA. A freestone Elberta type ripening 10 days later than Elberta. Head of the list for extending the Elberta season.

STUART'S FINE APPLES

The apple is one of the most dependable and profitable of fruits. The trees are hardy, long-lived, and bloom so late that crops are seldom lost because of frost or late freeze. The apple is adapted to many soils of the Southwest and will do well in sandy soils too wet for peaches. We recommend the following varieties. Ripening dates are for North Central Texas.

HOLLAND APPLE. Ripe in early August, this wonderful, big, almost solid red apple reaches market ahead of any of comparable quality. It is a native of Texas and the very best for the Southwest and at home wherever apples are grown. Trees often bear at two years and fruit needs thinning after three or four years. In great demand and growers are planting as nurseries can supply. Here is a product you can cash in. Northern experiment stations are calling Holland one of the best. Order early. If you intend a commercial planting, write at once for prices.

2-3 ft., \$.95; 3-5 ft., \$1.45

JONATHAN. An old favorite. Good flavor, excellent for eating and cooking. Red. Medium size. Dependable bearer. Probably the best pollinator for Delicious. Ripe September 1.

DELICIOUS, DOUBLE RED. Early September. No other apple has the distinct flavor of this old favorite. This is the one that comes to mind when someone mentions eating an apple. No other apple has the peculiar five points at the bloom end of the fruit. Shy bearer if you do not have good pollinators. The largest of all apples. Fine flavor. The thrifty, fast-growing trees seem to be the hardiest of all.

YELLOW DELICIOUS. Ripe with Red Delicious. Far better producer. Shaped almost like Delicious, but the five points are not nearly as pronounced. Golden, transparent color. Heavy bearer. Fruit large, ships well. A favorite on many markets. Often brings top prices. Excellent for eating and a good cooker. We highly recommend Yellow Delicious.

Prices on Apple Trees, 2-3 ft., \$.65; 3-5 ft., \$.90

for your table delight

GEM EVERBEARING

This giant Strawberry is fast becoming the most popular everbearing variety. Almost every place Strawberries are grown, Gem is proving a grand success. The large, firm, bright red berries are of very high quality. They are even better than this picture, and what a flavor—nothing like a heaping bowl of delicious Strawberries for breakfast, or eating fresh out of your garden, in the evening after work. Gem will start bearing 60 to 80 days after planting, and will produce lots of good eating until frost.

100 plants for.....	3.00

BOYSENBERRY. A favorite. Giant fruit. Heavily flavored, heavy producer. Deep purple color. All who eat this berry will want more. Cannot be beaten for canning or jams and pies. Has sweet taste all its own. No other like it. Has a tendency to cling to the ground; many train it on a low trellis after first year. Per dozen, \$1.75; per 100, \$12.00.

EARLY WONDER. Classed as a blackberry, although cross between dew and blackberry. A large, round, firm berry, Fine quality. Hauls well. The leading market berry. Heavy bearer. Does well in all sections. We recommend the EARLY WONDER highly, and you will like it. Per dozen, \$1.00; per 100, \$6.00.

AUSTIN DEWBERRY. Plants vigorous and very prolific. Fruit large, black and fine quality. The AUSTIN is a money maker. Per dozen, \$1.00; per 100, \$6.00.

APRICOTS

MOORE PARK. Early June. Largest and prettiest. Fine quality. Golden with red cheek. A favorite for many years.

BRYAN. First week in June. Introduced a few years ago from a seedling at Dublin, Texas. Has since been the most dependable producer in central West Texas. Produces when others fail. Medium size, yellow, with red tinge. No fibers, fine flavor. For our section, the very best apricot.

3-5 ft., \$1.00 each

GEM EVERBEARING

FRUITS . . .

PLUMS

BRUCE. Early, last few days of May. Extra large, red. One of the best producers. Good quality. Fine eating and cooking plum. The fruit will turn almost white a few days before ripening and should be handled for market at this stage. The Bruce is one of the best money makers in the commercial field. By all means plant some Bruce.

SAPA CHERRY PLUM. Ripens in late June. The best of the cherry plums. Favorite for cooking. Dark purple carries to the seed. Makes the prettiest jelly and pies, similar to cherries. Grows very crooked, making a bush instead of a tree. Trees out of the nursery rows will not be straight. You will have satisfaction growing the Sapa.

BURBANK. June 25. Prolific bearer. Delicious; one of the favorites for eating. Rusty red with

purple tinge, yellow flesh. Good shipper. A good market plum.

3 to 4 ft., 90c each

CHERRIES

HANSEN BUSH CHERRY. This cherry is famous for its hardiness and productiveness. It is beautiful in bloom and bears good sized fruit of delicious flavor from the ground to the tips of its limbs. Very dependable and bears in localities where other cherries fail. 2 to 3 feet, 95c.

MONTMORENCY CHERRY. The universal favorite. Fruit large and of best quality. Trees bear young; hardy and highly productive. The leading sour cherry for commercial plantings.

3-5 ft., \$1.65 each; 3 for \$4.50

BRYAN APRICOTS

PERSIMMONS

EUREKA PERSIMMON (Japan). This is a beautiful tree. Ripens its colorful fruit after the leaves fall. The EUREKA is THE commercial variety. It is the prettiest, best flavored, and best shipper. The EUREKA is tomato shaped and very red when well ripe. The fruit may be plucked when orange colored, as it ripens well after gathering. If you want to hurry the ripening, gather when firm, store in your refrigerator for two or three days and then remove to normal temperature. They will ripen at once and retain their flavor.

2-3 ft., \$1.30; 3-5 ft., \$1.85

FIGS

TEXAS EVERBEARING. A few plants of the Texas everbearing fig will furnish you fine preserves and fruits for eating fresh. The fig freezes to the ground in our hard winters and then comes out and ripens fruit from August until frost. Often bears the same year that it is set. The TEXAS EVERBEARING is far ahead of other varieties for hardiness. Bears well; large, smooth bronze fruit of excellent quality.

2-3 ft., 80c each; 3 for \$2.25

YOUR GRAPE ARBOR

CONCORD. The leading commercial grape, except in the Southwest, where the Carman is better suited than CONCORD. Color: blue-black, large berries. Fine for juice and fresh eating. August 20.

CARMAN. Large, almost black. Heavy producer. The very best grape for the Southwest. Big, compact bunches. Fine flavor. Excellent juice grape. By far the best grape for Texas. August 1.

NIAGARA. The most popular white grape. Very sweet. The choice with many for eating. Medium bunches, large berry. Good producer. July 20.

NO. 1 GRADE

HYBRID — TEA BUSH ROSES

RED RADIANCE. Rich red in color. Good buds and flower. Strongest of bushes. Will keep you in bouquets from spring until winter.

ETOILE DE HOLLANDE. Clear crimson of velvet texture. Heavy bloomer, good bush. A lovely. One of the leaders.

POINSETTIA. A new rose that is becoming very popular. So named after the Christmas Poinsettia. Has the color of the Yuletide flower. Flower large with curving petals. We sell the new roses at same prices as for the old standbys. Gorgeous buds!

ROUGE MALLERIN. Scarlet, damask fragrant blooms. A brilliant full petaled rose, 3½ inches. Exquisitely beautiful in the fall.

PINK RADIANCE. Perfect buds, large heavy flowers of rose pink. Strong bush and prolific producer. Can't beat PINK RADIANCE.

EDITOR McFARLAND. Truly beautiful, with deep, even pink color. Fine cut flowers. Good bush. One of the very best.

BRIARCLIFF (Columbia). Peach pink. A standard cutting flower. Exquisite in bud and blooms. Good both as garden and bench rose.

CALEDONIA. A pure white Rose, good for cutting. Foliage is dark, leathery in texture, against which the large blooms show in striking contrast. Among the best of white Roses.

GOLDEN CHARM. Deep yellow buds on a very strong bush. Pleasing in effect, vigorous and hardy. A deservedly popular Rose. Fresh, strong and vigorous plants.

SOEUR THERESE. A very fine yellow Rose. Buds are chrome-yellow with heavy carmine marks, while the flower is rich daffodil-yellow. Fragrant. A continuous bloomer.

TALISMAN. An oldtimer. One of the leading cut roses. Gay, combination of red, yellow and orange. Upright grower, lustrous foliage.

PRESIDENT HOOVER. Bush is very strong and blooms heavily. A soft blending of scarlet, yellow and flame. Extra large blossom. A beautiful rose.

POLYANTHA ROSES

GOLDEN SALMON. A striking bedding rose of alluring orange color. This is the best polyantha of this color. Makes a splendid display when planted in large groups. Faded trusses should be cut if continuous bloom is desired.

IDEAL. The very finest dark scarlet bedding rose. Excellent for low hedge or border. A vigorous plant that bears large trusses of blooms in compact bunches.

CLIMBING ROSES

PAUL'S SCARLET CLIMBER. This rose is truly a beauty in bloom. Its breath-taking profusion of scarlet blossoms last for weeks in the spring. More PAUL'S SCARLET are sold than any other of the climbers.

CLIMBING TALISMAN. Multi-colored blooms similar to the bush TALISMAN. A monthly bloomer and a strong favorite.

CLIMBING RED RADIANCE. Like the bush Radiance, only for its climbing ability. A monthly bloomer and very hardy.

FRAU KARL DRUSKI. White, an excellent climber, with strong, healthy canes. Blooms are large and creamy white and blooms monthly.

SUTTER'S GOLD
Plant Pat. 885

The OF YOUR

SUTTER'S GOLD—1950 All America Award and Bagatelle Winner. The outstanding feature of this variety is its beautiful, long-pointed, yellow bud, richly shaded with orange and red. Because the plant is so strong, vigorous, and free-branching, it produces great quantities of these extraordinary fine buds, each one borne on a long straight stem, just right for cutting. An abundance of large glossy leaves makes the plant a handsome one.

Sutter's Gold has a rich tea fragrance not found in any other yellow rose. The 24-petaled flowers are high-centered and richly colored when they first open. **\$2.00 each; 3 for \$5.10.**

PEACE. Unquestionably the World's Most Beautiful Rose. Plant Patent No. 591. This rose is almost unbelievable. One of its many marvels is the range of colors through which it passes—from opening yellow buds, with edges picoteed cerise to the glorious 5-inch blooms. Each petal is edged with pink that seems to deepen as the flower slowly opens. Though the blossom is unusually large, long lasting, and constantly fresh looking, its effect is always delicate and lovely. The individual petals are large and of great substance, gradually opening around a high-pointed center to a great, golden-hearted, very double, flower. The plant is as superior as the bloom. Foliage is large, shining, and unusually durable and attractive. The flowers are borne singly on heavy, strong, straight stems. The plant needs no dis-budding to produce exhibition blooms. The flowers are produced all season in an endless succession, through various stages of opening and changing colors—canary yellow, pale, gold, cream, ivory, and alabaster, tipped cerise, rose or apple blossom pink. **\$2.00 each; 3 for \$5.00.**

PEACE
Plant Pat. 591

CLIMBING PEACE. Beautiful and sturdy climber with the blossoming qualities of the Peace Bush Rose described above. **\$2.00 each; 3 for \$5.00.**

CHARLOTTE ARMSTRONG. One of the very finest Roses. Delightful large, long, slender, carmine-red buds open into magnificent deep

CHARLOTTE ARMSTRONG
Plant Pat. 455

Aristocrats

ROSE GARDEN

glistening rose-pink blooms. Only about 30 petals, but they are large, making a full, beautiful flower. The bush is very vigorous, with long, strong stems fine for cutting. Plant Pat. 455. **\$1.50 each; 3 for \$3.75.**

FORTY-NINER is acclaimed the most brilliant hued bi-colored rose ever produced. The rich yellow color of the outside petals makes perfect harmony with the vivid red inside. The chrome yellow bud is sometimes overlaid with pink, the yellow changing to straw yellow in the open blossom. The fading process seems only to enhance the beauty of the bloom, with the Orient-red of the inside of the petals turning cherry color as the bloom ages. **Each, \$1.75.**

SHOW GIRL. Plant Pat. 646. The graceful, beautifully formed, long-lasting pink buds, ideally adapted for cutting, the extra long stems, the very strong and vigorous plants make this the finest deep pink Rose we know. Show Girl has become the favorite pink for cut flowers because of the heavy-textured, slender buds, opening to the loveliest full-blown flowers you can imagine. Because of all its splendid qualities, we predict Show Girl will become the standard by which pink Roses will be judged for many years to come.

Wherever Roses are grown, Show Girl is found to be one of the best plants for the garden. The bush is tall, strong, rather slender, with heavy canes. It withstands the rigors of heat and cold as do few others. We know of no Rose that will prove quite so satisfactory. So if you want the best, order Show Girl now, plant early and enjoy the magnificent blooms of this fine Rose. **\$1.50 each.**

MIRANDY. The first place winner of the All-America Rose Competition for 1945. A gorgeous fragrant red rose that takes its place with the finest red roses of the world. The big, ovoid buds, often long-pointed, are deep, rich, dark red with black shadings, opening to a gorgeous Chrysanthemum-red. The flower displays new beauties of form as the petals unfold and eventually becomes a large full bloom (50 petals), with excellent lasting qualities. Mirandy has a wonderful, penetrating, damask fragrance which many will say is the finest rose fragrance they have ever inhaled. The plant is strong, free branching, with heavy stout stems, and keeps producing its glorious flowers freely all season against a background of dark green, heavy-textured foliage. Plant Pat. 632. **\$1.50 each; 3 for \$3.75.**

PATENTED ROSES

HYDRANGEA, P. G.

FORSYTHIA (GOLDEN BELL)

CYDONIA JAPONICA

FLOWERING SHRUBS and ORNAMENTAL TREES . . .

FLOWERING SHRUBS

FLOWERING ALMOND. Dainty double blossoms in the spring make this a very attractive shrub. Flowers in great abundance and very decorative. Fine plants for use in grouping or for lawn shrub. Double pink. 1-2 ft., each 75c.

ALTHEA (Rose of Sharon). Deep red, purple, or white. Very double. Blossoms heavily from the time warm weather comes until frost. Very hardy and drought resistant. Grows to ten feet. 3-4 ft., each 85c.

CORAL BERRY (Indian Currant). Very hardy plant of weeping growth; foliage velvety green. Tiny white flowers in early summer, and loaded with rose colored berries throughout fall and winter. Decorative in vase or wreath at Christmas time. 18-24 in., each 50c; 10 for \$4.00.

CRAPE MYRTLE. Red, purple or pink. All know the CRAPE MYRTLE. Who would want their garden to be without this shrub? Hardy and in bloom throughout summer and fall. Beautiful in tree shape or shrub form. 2-3 ft., each 75c; \$3 for \$2.00.

CYDONIA JAPONICA (Rubra). Commonly called Flowering Quince. Most gorgeous of all the early blooming shrubs. Hardy. In late winter and early spring it loads itself with flaming red blossoms which are a glory to behold. Plant what you have room for, as specimen or as hedges. 18-24 in., each 75c; 3 for \$2.00.

DEUTZIA (Pride of Rochester). A hardy spring flowering shrub that grows to 5 feet. A wealth of very double, white flowers bloom along the

canes to make a pretty picture. Strong, well-rooted plants. 2-3 ft., each 75c.

FORSYTHIA (Golden Bell). Grows to 6 feet. Bears golden, bell-shaped blossoms of medium size all along the canes before the appearance of leaves, about March 1. Several planted in clumps make a gorgeous display. 2-3 ft., each 65c; 3 for \$1.75.

HYDRANGEA, P. G. Large, conical heads of white flowers changing to pink with age. Very popular. Needs close pruning each spring. Blooms June to frost. 1-2 ft., each 75c; 3 for \$2.00.

LILAC. Purple blooms borne in great profusion. Makes beautiful flowering tall hedge. Not inclined to sprout from roots. 1-2 ft., each 75c; 3 for \$2.00.

FRENCH LILAC; Charles X. Dark red, you can't match the exotic beauty of this hybrid lilac. The old standby in French Lilacs. 18-24 in., each \$2.00.

MOCK ORANGE. Long branches are covered with fragrant, starry white flowers in the early summer. This shrub is very lovely, and will perfume your garden. 2-3 ft., each 75c; 3 for \$2.00.

SPIREA, Callosa Rosea. One of America's most popular low-growing shrubs. Similar to Anthony Waterer in bloom and upright growth, except it grows slightly larger and is much hardier. Flowers are dark pink. Blooms profusely in the spring and carries some blossoms all summer. 18-24 in., each 75c; 3 for \$2.00.

SPIREA, Van Houttei (Bridal Wreath). Who could resist the arching sprays of this spring-

blooming shrub? Its beauty of white blossoms is a veritable bank of snow white which is beyond description. Plant all you have room for, 18-24 in., each 60c; 3 for \$1.50.

WEIGELA (Rosea). A multitude of small bouquets are borne along the arching canes of this hardy and graceful shrub in its blooming season, summer and fall. The well-defined flowers are a beautiful pink. 18-24 in., each 75c; 3 for \$2.00.

FLOWERING TREES

RED BUD. Not many of these trees reach a height of more than 10 feet and the spread is about the same. Very shapely. Entire tree covered with soft, glowing, pink blossoms before appearance of leaves. 4-5 ft., each \$1.10; 5-7 ft., \$2.00.

RED FLOWERING PEACH. Spectacular and beautiful in bloom. 2-3 ft. each \$1.10.

DESERT FLOWERING WILLOW. A very hardy shrub or tree to 20 feet, bearing narrow leaves and handsome crimped, trumpet-shaped flowers. These are lilac-colored with two yellow stripes inside. 4-5 ft., each \$1.10.

BIRD OF PARADISE (Poinciana). A very showy shrub with mimosa-like leaves and clusters of light yellow flowers with long stamens of brilliant red. 3-4 ft., each \$1.10.

PUSSY WILLOW (Salix Discolor). The silvery catkins appear before the leaves in early spring, and are lovely for flower arrangements. It is noted for its symmetrical growth and will grow most anywhere. 5-6 ft., each \$1.10.

CRAPE MYRTLE

RED BUD

ALTHEA (ROSE OF SHARON)

STUART'S GUARANTEE

We guarantee all stock to be true to name. If it should prove otherwise, we will replace free or refund the purchase price.

Our nursery stock is guaranteed to be up to standard, disease-free, and to reach you in good, live condition. If you are not entirely satisfied upon arrival of your stock, return it to us at once, and we will replace free or refund your money.

We give no warranty, express or implied, as to growth or productiveness.

Prices are for cash with order, and all stock offered is subject to prior sale.

BULBS

AMARYLLIS

JOHNSONI. Immense blooms of deep velvety crimson with white markings in the throat often measures 6 inches across. Strong bulbs. Each, 85c; 3 for \$2.25, postpaid.

GLADIOLUS

Twelve No. 1 glad bulbs; florist mixture. \$1.00; 25 for \$1.85; 50 for \$3.50, prepaid.

CANNAS

KING HUMBERT. Bright orange scarlet trusses; attractive bronze foliage. A wonderful bedder.
THE PRESIDENT. A beautiful red canna with immense trusses of gigantic flame scarlet.

DAHLIAS

DAHLIA COLLECTION. Three of the most popular, large DAHLIAS, Yellow, Red and Laven-der. All 3 postpaid for only \$1.50.

VINES

HALL'S HONEYSUCKLE. This is the best known and most fragrant of the honeysuckles. Ever-green, dark and dense foliage. White flowers changing to golden as they age; last throughout the growing season. Heavy Plants: 75c each, 3 for \$2.00, postpaid.

GOLD FLAME HONEYSUCKLE. The blooms on this honeysuckle are very striking and showy

and adorn the vine the year around. The delicate fragrance, especially in the evening, is very en-tering. Runners of medium length. Strong two-year-old vines. 1 to 2 ft., each 90c, postpaid.

WISTERIA. When you set this vine, you may consider that you have made a planting of perma-nence. Its wealth of display will increase each year. Please keep it trimmed to a single trunk up to 4 feet, for you may have this vine 50 years. Well rooted plants. Purple. Each, 75c, postpaid.

QUEEN'S WREATH. This beautiful climber is also called Mexican Love Vine. It is one of the most beautiful climbers that grow. A perennial that comes from the root each year. Strong roots. Plants, 75c; 3 for \$2.00, postpaid.

HEDGES

AMOR RIVER PRIVET. Very rugged and depend-able. Can be sheared to any design. Also used as screen by pruning. 1-2 ft. plants, 10 for \$1.00; 2-3 ft., 20c each.

LIGUSTRUM JAPANESE. Fast grower. Large glossy foliage. Use as screen or trim to hedge. 2 to 3 ft., 75c; 10 for \$5.00.

HARDY GOLDEN PRIVET. New hardy privet that carries golden-yellow leaves. Develops a neat, compact shrub that can be trimmed into any shape. Suitable for use as an individual shrub, or for hedging. 18 to 24 inch, 10 for \$1.75.

LIGUSTRUM OBTUSIFOLIUM, IBOTA PRIVET. Low dense shrub, with almost horizontally spreading branches. 18-24 inch, 10 plants for \$1.75.

ITALIAN CYPRESS

GARDENIA. This wonderful old favorite needs no description. Flowers very fragrant, snow white, and beautiful. Evergreen, and the variety we offer is the most hardy. **Price in gallon cans, \$2.00 each.**

MAHONIA (Oregon Holly Grape). A member of the holly family. Foliage green in summer and bronze in winter. Very attractive. Hardy and popular. **Price, 12-15 in. in gallon cans, \$2.00.**

EUONYMUS JAPONICA. Hardy and quick growing. May be sheared to any shape or trained as a semi-trailer. Leaves medium large, dark green. **Price, 1 to 2 ft., 75c; in gallon cans, 1.50.**

LIGUSTRUM. Wax Leaf. Glossy, dark green foliage. Symmetrical, compact grower which does well in sun or shade. Panicles of fragrant white flowers in spring. Very popular. **Price, 1 to 2 ft., 75c; in gallon cans, \$1.50.**

HOLLY BURFORDI. A deep green leaf with a bright red Holly berry makes this one of the most sought after of all Evergreens. **In gallon container only, \$1.95 each.**

CHINESE HOLLY. Hardy medium shrub with deep green glossy leaves like Christmas holly. Longer leaves, and spines, and grows faster than Burfordi. **Price in gallon cans, \$1.75.**

COTONEASTER, PARNEYI. Medium growing shrub with luxuriant deep green foliage the year 'round. Brilliant red berries. Most popular cotoneaster and one of the finest shrubs for landscape planting. **15-18 inch, \$1.50.**

JASMINE FLORIDUM. Bright green foliage on graceful drooping branches. Small but showy yellow flowers throughout summer. **12 to 18 in., 75c each.**

PHOTINIA (Serrulata). A large, handsome shrub with slightly curled, indented leaves. The new foliage in spring is a bright red. Best used around large buildings or for heavy landscape plantings. Not particular about soil or situation. **Price each, 1 to 2 ft., 85c; in gallon cans, \$1.50.**

PFITZER JUNIPER. Most satisfactory of the creeping Junipers. Foliage dark green, Height 2 feet, spread 5 feet or more. **In gallon cans, \$2.00.**

ARIZONA CYPRESS. Very popular in the Southwest. A beautiful tree that grows to 25 feet. Blue-gray foliage. Natural growth is spreading but can be kept slender by shearing. The ARIZONA is hard to transplant, but once started is hardy and drouth resistant. Do not water this plant as much as other Evergreens. **2-3 ft. in gallon cans, \$1.75.**

CEDRUS DEODARA. This is the outdoor Christmas Tree. It has a silver foliage and spreads on the bottom, tapering to a point at top. One of the highest priced of all Evergreens, offered at a big saving. **Price in gallon can, \$1.95 each.**

ITALIAN CYPRESS. A tall, slender tree of upright growth. A stately tree and very green. Takes very little room but reaches great height. **Price, 2-3 ft. in gallon can, \$2.75; 3-4 ft. in gallon cans, \$3.25.**

We are large growers of nursery stock, and take pride in the **QUALITY** of the stock we sell. We are determined to supply you with the very best trees and plants, up to grade, free of disease, **TRUE TO NAME**, and at **FAIR PRICES**. **VISITORS ARE ALWAYS WELCOME.**

Every Home in the **SOUTHWEST** SHOULD have its own Orchard. The Varieties listed in this catalog are the very best **PRODUCERS**.

WAX LEAF LIGUSTRUM

PFITZER JUNIPER

SHADE TREES

TEXAS UMBRELLA CHINA. We know of no other tree with such a dense umbrella top and such dark, shiny foliage. Unequalled for shade. Fine for back yard or shade for poultry. 3 to 4 ft., each \$1.50; 3 for \$4.00.

SYCAMORE. Hardy and very fast grower. Grows to immense size. White bark makes the SYCAMORE a very desirable tree. 4 to 5 ft., each \$1.00; 6 for \$5.00.

CHINESE ELM. Very desirable for quick shade. Fastest grower of all. Pyramidal, compact growth. Excellent for wind break. Price, 4-5 ft., each \$1.00; 3 for \$2.75; 5-7 ft. trees, \$2.00.

AMERICAN ELM. One of America's best known trees and planted throughout the country for streets and parks. Tall growing and stately. Price, 4 to 5 ft., each \$1.00; 6 for \$5.00; 5-7 ft., \$2.00.

LOMBARDY POPLAR. Beautiful, tall, slender. Fast grower. Stately and graceful. 4 to 5 ft., each \$1.10; 6 for \$5.00.

MIMOSA. One of the most beautiful of the ornamental flowering trees. A rapid grower and a profuse bloomer in the summer. Its foliage is fern-like and the flowers are a delightful shade of pink. An excellent tree for your lawn as a specimen. Very colorful. Price, 4 to 5 ft., \$1.10; 5 to 7 ft., \$2.00.

WEeping WILLOWS. The arching branches of this tree, covered with slender leaves, makes it a wonderful specimen for lawn or park. 4 to 5 ft., \$1.00.

GREEN ASH. Grows rapidly to 40 ft. Wide spreading branches. The wood is heavy and strong. Thrives in a comparatively dry area. Price, 4-5 ft., \$1.10.

WHITE ASH. This tree has a long, oval shape, which makes it desirable for lawns because grass will grow well beneath. Its pinnate foliage is dense and generally free from insects. Autumn turns the leaves a brilliant yellow and shades of violet. Price, 4 to 5 ft., \$1.10.

MAGNOLIA GRANDIFLORA. This tree is the grandest one of the Magnolia tribe and sometimes reaches 100 ft. It has large, lustrous, evergreen leaves and its showy 8-in. flowers are like giant roses casting their fragrance far and wide. You will want at least one either for shade or specimen or both. 1-2 ft. in gal. can. Each, \$1.75..

IMPORTANT!

For five years we have shipped successfully container-grown and balled and burlapped specimen evergreens. They are shipped to you in a special container, express collect, and are worth the difference in price.

EUONYMUS JAPONICA

ARIZONA CYPRESS

NANDINA

BERKMAN'S GOLDEN ARBORVITAE

BAKER ARBORVITAE

ABELIA

Evergreens for Year Around Beauty

ABELIA. Makes wonderful flowering hedge or foundation plant. Foliage glossy green, waxy in winter. Flowers star shaped and carried in abundance throughout the summer. 1 to 2 ft., 80c.

NANDINA. Very decorative. Thick, upright growth. In the spring and summer, the slender, pointed leaves are bright green; in early fall they begin to redden; by winter, they are scarlet. Loaded with bright red berries through the winter. In our section the best known and most popular of the Broadleaf Evergreens. More sold than any other. 12-15 inch, 75c; 15-18 inch, \$1.00.

PYRACANTHA, Red or Orange Berry. Commonly called Firethorn. Tall, upright evergreen covered with bright orange or red berries during the winter months. Leaves are dark, shiny green. Endures extreme cold. Price, 18-24 inch, 90c; in gallon cans, \$2.00. State color.

BARBERRY, Red Leaf. Has lustrous purple-red foliage all season, with red berries almost all winter. Makes a dense, compact shrub about 3 feet tall. Plant in full sunlight. Hardy. 15 to 18 in., 75c; 3 for \$2.00.

BERKMAN'S GOLDEN ARBORVITAE. Of medium height, very hardy. Golden color makes it a useful subject where contrast is desired. 18 to 24 inches. Each, \$2.95.

BAKER ARBORVITAE. Best known of the arborvitae. Bright green, pyramidal, tall and compact. Fast grower. Price, 24-30 inch B & B, \$2.50; 30-36 inch B & B, \$3.00.

BLUESPIRE ARBORVITAE. Foliage flat, set on edge; very compact. Somewhat conical in form, grows well under adverse conditions. 24-30 inch B & B, \$2.50; 30-36 inch B & B, \$3.00.

BLUE GLOBE. Certainly one of the best of all Arbor-Vitae. Growing to a height of 5 to 6 ft., the Blue Globe is very compact and has a rich, deep green color. 24-30 inch B & B, \$2.75.

BIOTA BONITA ARBORVITAE. Perfect globe shaped. Hardy. Dwarf; extreme height four feet. Foliage dark green. Very popular. Fine for cemetery. Price 18-24 inch B & B, \$2.50; 24 to 30-inch, \$3.00.
